

Senior Java Developer

Company background

Emerging Markets Consultants (EMC) is a leading Bulgarian company in the risk management, cross-asset trading & portfolio management consulting in Oil and Gas, Energy and Banking sectors. Our consultants and developers work full time with some of the biggest commodity and energy companies as well as some of the biggest banks in the world. The company is an official partner of OpenLink for Bulgaria and Eastern Europe, the worldwide leader in Energy Trading and Risk Management Software.

Job description

We are looking for an experienced Senior Software Developer in Java that will be responsible for new software development as well as working on existing Java solutions as part of Energy and Finance management software applications. The ability to multitask is a must since often there will be several simultaneous projects including working with our business consultants to resolve client issues, testing and debugging, gathering new technical requirements, designing and implementing various functionalities, interfaces, applications, components and in general technical solutions with high level of complexity improving the system's functionality and meeting the exact needs of our clients.

The ideal candidate

- Self-driven team player with the ability to work individually (if needed)
- 4+ years practical experience in enterprise IT software development
- Ability to understand very well business requirements and apply them in the best possible way to design, implement and produce good technical solutions
- Ability to estimate and execute implementation tasks in a timely and efficient manner
- Ability to help and mentor younger colleagues and share valuable experience and knowledge with them

Job requirements

- BS/MS in Computer science degree or an equivalent relevant IT training
- Profound practical experience and very strong knowledge in Java and J2EE
- Previous relevant working experience (4+ years) in software development with Java
- Experience with WebServices. EJBs, XML, XSLT, JMS is a plus
- Experience with relational databases, including Oracle or MS SQL Server
- Experience with Spring and Hibernate is plus
- Practical experience with design and implementation of complex technical solutions
- The desire to learn, be creative and work in a team environment needed
- Very good command of the English language (written and spoken)
- Knowledge of any Energy Trading and Risk Management systems such as XDM, OpenLink, Endur is considered as plus
